

MIHIR CHAUDHARI

Pune, Maharashtra, India | mihir.chaudhari@outlook.com | +91 7030891636 | LinkedIn: mihir-chaudhari-6063b720a

PROFESSIONAL SUMMARY

Java Full Stack Engineer with hands-on experience architecting and deploying Spring Boot microservices, RESTful APIs, and cloud-native applications for enterprise insurance systems. Skilled in performance optimization, root-cause debugging, CI/CD automation, and container deployment on AWS and Red Hat OpenShift. Uses AI-assisted tools, including Claude (Opus, Sonnet) and GitHub Copilot, for code generation and debugging. Delivered measurable outcomes: 25% faster process throughput, 30% reduction in downtime, and 25% faster query execution.

CORE SKILLS

Languages	Java (Core Java, Java 8 — Collections, Streams, Lambdas, Exception Handling)
Backend	Spring Boot, Spring MVC, REST APIs, Microservices Architecture, OOP Design
Frontend	Angular (basic)
Databases	PostgreSQL, Oracle, PL/SQL, RDBMS/SQL
Cloud & DevOps	AWS (EC2, S3, Lambda), Red Hat OpenShift, Jenkins, Git, GitHub, Maven, CI/CD
AI-Assisted Dev	Claude (Opus, Sonnet), GitHub Copilot for code generation and debugging
Practices	Agile/Scrum, Performance Tuning, Code Review, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Software Developer

Sep 2023 – Present

Client: Bajaj Life Insurance Company

- Led design and development of scalable microservices using Java 8 and Spring Boot for enterprise insurance applications, improving process efficiency by 25%.
- Designed and exposed RESTful APIs powering core business workflows, ensuring high availability and consistent performance across production environments.
- Optimized application performance, logging, and exception handling, cutting API response time by 20%.
- Diagnosed and resolved critical production issues through root-cause analysis, reducing system downtime by 30%.
- Built and maintained CI/CD pipelines using Jenkins and GitHub, enabling faster and more reliable deployments in an Agile delivery model.
- Deployed and managed containerized applications on AWS and Red Hat OpenShift, supporting scalable, resilient infrastructure.

AWS Cloud Intern

Apr 2023 – Jul 2023

FXIII Technologies Pvt. Ltd.

- Implemented core AWS services (EC2, S3, Lambda) for application deployment and process automation, improving infrastructure scalability and performance by 15%.
- Reduced cloud costs by 10% while maintaining 99.9% system uptime.

KEY PROJECTS

Insurance Business Processing Dashboard

Mar 2025 – Present

Spring Boot Microservices

- Built RESTful APIs with Spring Boot to integrate with a Policy Administration System (PAS), supporting end-to-end policy workflows.
- Automated business workflows covering 34% of new business and 22% of servicing requests.
- Optimized Oracle PL/SQL queries, cutting execution time by 25%.
- Designed a scalable microservices architecture to support high transaction volumes.
- Set up CI/CD pipelines and deployed to OpenShift, achieving 99.9% uptime.

Logistics & Docket Management System

Sep 2023 – Mar 2025

Spring Boot + Angular

- Built a full-stack enterprise application using Spring Boot and Angular for end-to-end document lifecycle management.
- Designed RESTful APIs with PostgreSQL integration.
- Improved database performance by 25% through query optimization and indexing.
- Automated workflows, reducing operational delays by 20%, while collaborating in an Agile team on system design.

EDUCATION

Bachelor of Engineering, Computer Science

Savitribai Phule Pune University | 2019 – 2023 | CGPA: 8.15
